

Abhimanyu Saikia

Jorhat, Assam, India | +91 8822916339 | abhisaikia675@gmail.com | linkedin.com/in/saikia-abhimanyu | github.com/escursio675 | abhimanyusaikia.is-a.dev

Career Objective

Final-year Computer Science student with hands-on experience building full-stack applications using the MERN stack and frontend interfaces with React and TypeScript. Skilled in designing REST APIs, database schemas, and responsive UIs, with proven ability to contribute to production systems during a frontend internship at IOCL. Seeking a Full Stack (MERN) or Frontend Developer role to build scalable, user-focused web applications.

Education

Jorhat Engineering College (Assam Science and Technology University)

Bachelor of Technology in Computer Science and Engineering

Jorhat, Assam

Expected Graduation: 2027

- CGPA: 9.19 / 10

The Little Stars Senior Secondary School

High School Certificate, Central Board of Secondary Education

Digboi, Assam

2023

- Percentage: 95.3%

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, Embedded C
- **Frontend:** React, Next.js, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB (Mongoose), PostgreSQL
- **Machine Learning:** PyTorch, Deep Learning, CNNs, RNNs
- **Embedded Systems:** ARM Cortex-M (STM32), x86 Architecture, Assembly (NASM, ARM)
- **Tools & Platforms:** Git, GitHub, RESTful APIs, MongoDB Atlas, Render, Vercel

Experience

Indian Institute of Technology (IIT) Guwahati

Summer Research Intern

June 2025 – August 2025

Guwahati, Assam

- Collaborated on a comparative study of multiple CNN+RNN architectures for Automatic Image Captioning, implementing and training models using **Python** and **PyTorch**.
- Evaluated model performance using standard image captioning metrics, analyzing trade-offs across architectures to identify optimal configurations.

Indian Oil Corporation Limited (IOCL)

Frontend Developer Intern

January 2026

Assam, India

- Collaborated with a cross-functional team to design and build the user interface for an automated identity verification system used by employees.
- Developed responsive, reusable UI components using **React**, **TypeScript**, and **Tailwind CSS**.
- Translated design requirements into functional interfaces, improving usability and consistency across the application.

Projects

CounterAPI | React (Vite), TypeScript, Node.js, Express.js, MongoDB, Axios

- Built a full-stack REST API service enabling multiple websites to track custom event counters (e.g. page visits, button clicks) using per-site API keys.
- Designed the backend with **Node.js**, **Express**, and **MongoDB/Mongoose**, implementing custom per-site and admin API-key authentication with request rate limiting.
- Built and deployed a **React (Vite) + TypeScript** dashboard for managing counters end-to-end, hosting the stack across MongoDB Atlas, Render, and Vercel.

URLambda | React, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a full-stack URL shortener enabling users to generate, manage, and track shortened links through a dashboard.
- Designed the backend architecture: database schema, custom middleware, and RESTful API routes using **Express.js** and **MongoDB**.
- Implemented secure authentication using **Google Sign-In (OAuth)** and structured backend logic to support real-time tracking and analytics of converted links.

Certifications

- IBM Fullstack Software Developer — IBM (*in progress*)
- Introduction to Model Context Protocol — Anthropic (2026)
- Embedded System Design with ARM — NPTEL (2025)
- Microcontroller Embedded C Programming — FastBit Embedded Brain Academy (2025)
